

# Just a tray? No!

## Changing trays can dramatically improve your productivity!

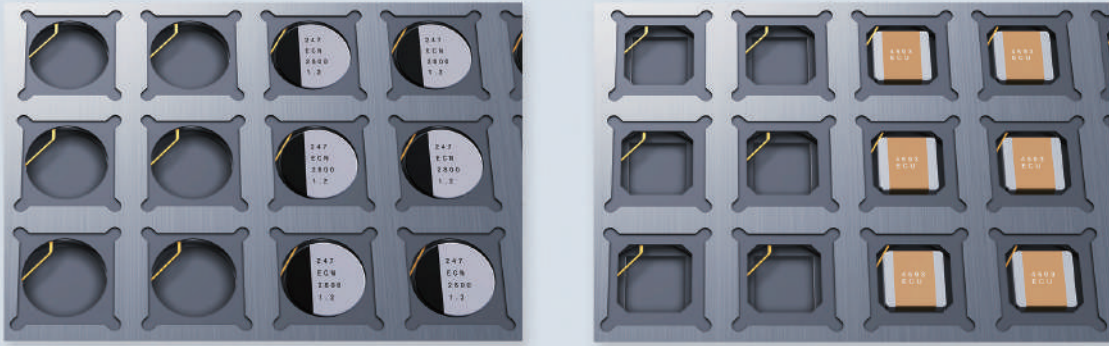

High-precision holding and positioning instantly!

\*Patent applied

- Compatible with size and shape
- Easy transfer
- Reversible + Washable
- Heat resistance + Durability
- Does not damage the products

# Newly released: Super Tray that solves conventional problems

- Achieve customization appropriate for various fields and applications
- Unique spring-type structure provides high-precision batch fixing and opening.
- Most of the processing can be done with the tray such as Vacuum deposition, printing, inspection, and assembly etc...
- Compatible with inversion operation
- Increased filling rate which improves production efficiency
- Full support applied from design to realization of proprietary standard products

**Usage : Laser marking / solder printing / screen printing / die bonding / wire bonding and more!**

TEL 813-6265-0495 (Hyodo / Hori) <https://upt-co.com/contact/>

**UPT leads the world in micro and precision technologies**

## World top share

Image stabilization system  
for smartphones VCM spring

\*According to our research

Utilizing photo-etching technology and etching + diffusion bonding technology, we provide unique products in various fields such as semiconductor test, automobile and medical care, contributing to the future of society.
